C. Configuration details of terminal allowed should be done on this page.

The screenshot shows the 'Payment Gateway' configuration page. The form is divided into several sections. The 'Title' field is set to 'Payment Gateway'. The 'Description' field is set to 'Pay with Credit Card / MyT Money'. The 'Terminal ID' field is set to 'localgencard'. The 'Password' field is empty. The 'Currency' field is set to 'USD'. The 'Address' field is set to 'On'. The 'Dynamic Billing Descriptor' field is set to 'On'. The 'Color' field is set to 'Black'. The 'Background color' field is set to 'White'. The 'Button text color' field is set to 'White'. The 'API URL' field is set to 'API URL'. The 'Cron URL' field is set to 'Cron URL'. The 'File upload' field is set to 'Upload'. The 'Order Status' field is set to 'Cancelled'. The 'Geo Zone' field is set to 'All Zones'. The 'Status' field is set to 'On'. The 'Sort order' field is set to 'Sort order'. A small desktop icon tray is visible on the right side of the form.

- A. Layout of Paywise Checkout Page can be changed using Color, Background Color, Button Text Color variables.
- B. File name is the public key (checkout.publicKeyV2)
- C. The Order Status has to be set to “PENDING”
- D. Open cart does not support automatic cron job, so you will need to setup a cron on CPANEL or any other tools to call the endpoint as per “CRON Instructions”.
- E. API URL should be https://API_DOMAIN/hostedpayment/checkout.shtml
- F. CRON URL should be https://API_DOMAIN/paymentgateway/payments/performXmlTransaction
- G. Terminal Receipt URL (To be configured on Backoffice – PG) should be <https://HOST/index.php?route=extension/paywise/payment/paywise.callback>
